1 Executive Summary

Some introduction here about 5 lines.

The aim of this report is to provide design prototypes and conduct usability testing on the system.

2 Prototyping

Low-fidelity Prototype

The low-fidelity prototype section contains 3 wireframes of the system been designed and tested in this report.

3 Testing

Techniques

As part of the report, we have decided to acknowledge two methods that comply in Data gathering techniques which are based on an interview and a survey. The interview will be on five participants questioning on them of how they find the importance of nutrition in their life. And how often they would exercise to live a healthy balanced life.

We have designed a survey form for the improvements and knowing what people's thoughts are towards their nutrition diet and exercise. This will benefit our website to know the customer demanding needs which will bring improvements.

The Consent form filled by every subject that participated in this study is available in the Appendix A of this document.

5 Appendix A

[Consent Form](#)

Form filled and submitted by every subject that participated in this study, voluntary interviews and usability testing.

Consent Form

(Usability Design Prototype Design and Testing)

Consent Form

I agree to participate in the prototype and testing research study carried by Navjot Singh and Soffyan Ali for their Usability design project. The purpose and nature of the study has been explained to me. And I understand and agree that my participation is voluntary and I am completely free to refuse or opt out of the study anytime. I give permission for my interview to the research team.

I understand that the data collected from my participation may be used for purposes like thesis, journal publication etc.), and I consent it to be used in that manner.
